1. What is the value of  $(2^0 - 1 + 5^2 + 0)^{-1} \times 5$ ?

- (A)  $-125$    (B)  $-120$    (C)  $\frac{1}{5}$    (D)  $\frac{5}{24}$    (E)  $25$

PERSEVERANCE RIGOR DEDICATION 224 BISHAN STREET 23 BI-131

4. Pablo, Sofia, and Mia got some candy eggs at a party. Pablo had three times as many eggs as Sofia, and Sofia had twice as many eggs as Mia. Pablo decides to give some of his eggs to Sofia and Mia so that all three will have the same number of eggs. What fraction of his eggs should Pablo give to Sofia?

- (A)  $\frac{1}{12}$  (B)  $\frac{1}{6}$  (C)  $\frac{1}{4}$  (D)  $\frac{1}{3}$  (E)  $\frac{1}{2}$

5. Mr. Patrick teaches math to 15 students. He was grading tests and found that when he graded everyone's test except Payton's, the average grade for the class was 80. After he graded Payton's test, the test average became 81. What was Payton's score on the test?
- (A) 81    (B) 85    (C) 91    (D) 94    (E) 95

7. How many terms are there in the arithmetic sequence 13, 16, 19, . . . , 70, 73?
- (A) 20    (B) 21    (C) 24    (D) 60    (E) 61

MATHLETE TRAINING CENTRE

PERSEVERANCE RIGOR DEDICATION 224 BISHAN STREET 23 BI-131

8. Two years ago Pete was three times as old as his cousin Claire. Two years before that, Pete was four times as old as Claire. In how many years will the ratio of their ages be 2 : 1?

(A) 2    (B) 4    (C) 5    (D) 6    (E) 8

9. Two right circular cylinders have the same volume. The radius of the second cylinder is 10% more than the radius of the first. What is the relationship between the heights of the two cylinders?
- (A) The second height is 10% less than the first.  
(B) The first height is 10% more than the second.  
(C) The second height is 21% more than the first.  
(D) The first height is 21% more than the second.  
(E) The second height is 80% of the first.

14. The diagram below shows the circular face of a clock with radius 20 cm and a circular disk with radius 10 cm externally tangent to the clock face at 12 o'clock. The disk has an arrow painted on it, initially pointing in the upward vertical direction. Let the disk roll clockwise around the clock face. At what point on the clock face will the disk be tangent when the arrow is next pointing in the upward vertical direction?

- (A) 2 o'clock    (B) 3 o'clock    (C) 4 o'clock    (D) 6 o'clock    (E) 8 o'clock

15. Consider the set of all fractions  $\frac{x}{y}$ , where  $x$  and  $y$  are relatively prime positive integers. How many of these fractions have the property that if both numerator and denominator are increased by 1, the value of the fraction is increased by 10%?
- (A) 0    (B) 1    (C) 2    (D) 3    (E) Infinitely many

18. Hexadecimal (base-16) numbers are written using numeric digits 0 through 9 as well as the letters  $A$  through  $F$  to represent 10 through 15. Among the first 1000 positive integers, there are  $n$  whose hexadecimal representation contains only numeric digits. What is the sum of the digits of  $n$ ?
- (A) 17    (B) 18    (C) 19    (D) 20    (E) 21

MATHLETE TRAINING CENTRE

PERSEVERANCE RIGOR DEDICATION 224 BISHAN STREET 23 BI-131

19. The isosceles right triangle  $ABC$  has right angle at  $C$  and area 12.5. The rays trisecting  $\angle ACB$  intersect  $AB$  at  $D$  and  $E$ . What is the area of  $\triangle CDE$ ?

(A)  $\frac{5\sqrt{2}}{3}$     (B)  $\frac{50\sqrt{3} - 75}{4}$     (C)  $\frac{15\sqrt{3}}{8}$     (D)  $\frac{50 - 25\sqrt{3}}{2}$     (E)  $\frac{25}{6}$

24. For some positive integers  $p$ , there is a quadrilateral  $ABCD$  with positive integer side lengths, perimeter  $p$ , right angles at  $B$  and  $C$ ,  $AB = 2$ , and  $CD = AD$ . How many different values of  $p < 2015$  are possible?
- (A) 30    (B) 31    (C) 61    (D) 62    (E) 63

MATHLETE TRAINING CENTRE

PERSEVERANCE RIGOR DEDICATION 224 BISHAN STREET 23 BI-131

25. Let  $S$  be a square of side length 1. Two points are chosen at random on the sides of  $S$ . The probability that the straight-line distance between the points is at least  $\frac{1}{2}$  is  $\frac{a - b\pi}{c}$ , where  $a$ ,  $b$ , and  $c$  are positive integers with  $\gcd(a, b, c) = 1$ . What is  $a + b + c$ ?
- (A) 59    (B) 60    (C) 61    (D) 62    (E) 63
