

Mathlete Training Centre  
SMOPS 2024

**Round 1**

---

1.  $X$  is a factor of 2024 and a multiple of 23. How many values of  $X$  are there?

MATHLETE TRAINING CENTRE

PERSEVERANCE RIGOR DEDICATION 224 BISHAN STREET 23 BI-131

MATHLETE TRAINING CENTRE

PERSEVERANCE RIGOR DEDICATION 224 BISHAN STREET 23 BI-131

2. The price of an item is decreased by 5% and then increased by 40%. The new price is \$990 more than the original. What is the original price?

MATHLETE TRAINING CENTRE

PERSEVERANCE RIGOR DEDICATION 224 BISHAN STREET 23 BI-131

3. There are 3 people, A, B and C. They split \$1300 among themselves to invest. A and B together increased their money by 25% while C lost \$25. They had a total of \$1490 in the end. How much was C given at first?

MATHLETE TRAINING CENTRE

PERSEVERANCE RIGOR DEDICATION 224 BISHAN STREET 23 BI-131

4. There are 2000 cards in a deck numbered 1-2000 respectively. In one operation, all the cards with numbers that are perfect squares are removed. Then, all the remaining cards are renumbered 1,2,3... . How many operations must be done until 1 card remains?

MATHLETE TRAINING CENTRE

PERSEVERANCE RIGOR DEDICATION 224 BISHAN STREET 23 BI-131

5. If 8 identical dice are rolled at the same time, how many possible combinations of rolls are there? (Note that order does not matter)

MATHLETE TRAINING CENTRE

PERSEVERANCE RIGOR DEDICATION 224 BISHAN STREET 23 BI-131

6. When a number is divided by 100, the quotient is  $q$  and the remainder is  $r$ . If the sum of  $q$  and  $r$  is a multiple of 11, how many 4 digit numbers satisfy this?

PERSEVERANCE RIGOR DEDICATION 224 BISHAN STREET 23 BI-131

MATHLETE TRAINING CENTRE

PERSEVERANCE RIGOR DEDICATION 224 BISHAN STREET 23 BI-131

7.  $p$  and  $q$  are prime numbers. If  $3p^2q + 2pq^2 = 483$ , what is the maximum value of  $p+q$ ?

MATHLETE TRAINING CENTRE

PERSEVERANCE RIGOR DEDICATION 224 BISHAN STREET 23 BI-131

8. If arc  $AD =$  arc  $DB$ ,  $AC = CB = 5$ , and  $CD = 1$ , what is the value of the diameter?

PERSEVERANCE RIGOR DEDICATION 224 BISHAN STREET 23 BI-131

(insert figure)

MATHLETE TRAINING CENTRE

PERSEVERANCE RIGOR DEDICATION 224 BISHAN STREET 23 BI-131

9. From 1 to 2024, how many numbers are there where the sum of its digits equal to 10?

MATHLETE TRAINING CENTRE

PERSEVERANCE RIGOR DEDICATION 224 BISHAN STREET 23 BI-131

10. If the mean of  $a$ ,  $b$  and  $c$  is 100, the mean of  $a$ ,  $b$ ,  $c$ ,  $d$  and  $e$  is 90 and  $e = 4d$ , what is the value of  $e$ ?

20. During CNY, Mr Lee sets up a stack of oranges in a pyramid-like formation whose square base is made of 49 oranges (7 by 7). Each orange above the first level rests in the pocket formed by 4 oranges in the level below. The stack is completed by a single orange in the 7<sup>th</sup> level. How many oranges are there in the stack?

MATHLETE TRAINING CENTRE

PERSISTENCE RIGOR DEDICATION 224 BISHAN STREET #23-B1-131

21. 30 identical small cubes are placed together to form a rectangular solid. Find the total number of different rectangular solids that can be formed this way.

MATHLETE TRAINING CENTRE

PERSEVERANCE RIGOR DEDICATION 224 BISHAN STREET 23 BI-131

MATHLETE TRAINING CENTRE

22. A circus has an acrobatic bicycle with front and rear wheels of different sizes. The diameter of the front wheel is 140cm and the diameter of the back wheel is 90cm. How many centimeters did the bike move when the rear wheel made 10 more revolutions than the front wheel? (Take  $\pi = \frac{22}{7}$ )

PERSEVERANCE RIGOR DEDICATION 224 BISHAN STREET 23 BI-131

23. Let  $a$ ,  $b$ , and  $c$  be 3 distinct positive integers whose product is equal to 2024. What is the smallest value of the sum of  $a+b+c$ ?

MATHLETE TRAINING CENTRE

PERSEVERANCE RIGOR DEDICATION 224 BISHAN STREET #23 BI-131

MATHLETE TRAINING CENTRE

24. Two travellers's bags have a total weight of 77kg. The first traveller pays \$14 for extra weight while the second pays \$20 for extra weight. If both are checked in together, they pay \$94. What is the maximum bag weight?

MATHLETE TRAINING CENTRE

PERSEVERANCE RIGOR DEDICATION 224 BISHAN STREET #23 BI-131

25. One person wants to buy 4 donuts from a shop with sufficient supply of 3 flavours of donuts: original, chocolate and strawberry. How many possible combinations are there?

MATHLETE TRAINING CENTRE

PERSEVERANCE RIGOR DEDICATION 224 BISHAN STREET 23 BI-131

MATHLETE TRAINING CENTRE

26. What is the maximum number  $x$  such that if you roll a dice, the product of the 5 faces showing is always a multiple of  $x$ ?

MATHLETE TRAINING CENTRE

PERSEVERANCE RIGOR DEDICATION 224 BISHAN STREET 23 BI-131

27. The 49<sup>th</sup> day of year  $X$  is Monday.  
The 94<sup>th</sup> day of year  $X+1$  is Saturday.  
What is the first day of year  $X-1$ ?
